Zondan medical is located in Shenzhen city, which is the high-tech hub of China. Since the foundation in 2002, we have always focused on R&D, manufacturing and marketing of electrical & diagnostic medical equipments.

Under the guidance of “Improve human health with technology”, our company has put R&D into our first priority. In 2003, we had mastered independently the core technology of patient monitor and launched our own 6-in-1 parameter module. After 9 year’s development, we have 27 sales office across China and are one of the main brands of patient monitor in China. Since 2006, we have exported our quality equipments to international markets, and until 2010, our equipments are serving for people’s health in almost 60 countries, including West Europe, Middle East, North Africa & Nigeria, India, ASEAN, South Korea, etc.

As the electrical technology improves and competition grows, we expand our investment on R&D of new products. Every year we will launch 2-3 new equipments into market. Here after are some basic info about us:
